

Dear Fcc,

I have a long commute to work and have recently purchased a car with XM radio. I have found the services they provide more calming than FM or AM radio and therefore my commute is less stressful and I am better able to deal with the road hogs and idiot drivers I experience daily. Additionally the weather and traffic stations keep me more informed and safer when there are difficult road conditions. I willingly pay for these services and I am greatly distressed that one more of my liberties is being threatened by the Bush administration. I reject the NAB's petition 04-160 and support XM radio's ability to provide me with the services I demand and pay for!
